About Effective Micro-Organisms

Naturally healthy horses have billions of beneficial microbes all over their skin and throughout their intestines.

They are in harmonious balance and go unnoticed until a build-up of stress allows disease-causing bacteria to upset the balance.

Unfortunately in today's world, pastures and feeds contain only a small portion of the beneficial micro-organisms that horses require as part of their regular diet to be healthy.

EM Effective Micro-Organisms are these beneficial, healthy, live microbes that are safely and conveniently packaged to restore the balance.

They can be fed as
EM Syn-Vital

Or Applied topically as
EM Skin Care

EM Syn-Vital - Probiotic Feed Supplement

Horses rely on microbes in their gut to ferment the fibre they eat to make it digestible.

"Think of your horse as a giant fermentation vat on four legs" - Thoroughbred Times, 29/1/05

EM Syn-Vital

is a palatable feed supplement of bran that is inoculated with 'live' micro-organisms from 5 microbial groups. These Micro-organisms can survive going through the stomach to the hind gut.

The live yeasts and beneficial bacteria then rapidly colonise to heal the hind gut.

Horses with good digestion are better able to cope with stress. They have more nutrients, vitamins and trace elements available, which boosts the immune system and their performance.

They are then less prone to digestive upsets; such as colic, ulcers, diarrhoea and laminitis. Ideal for use before stressful events or post antibiotics.

EM Skin Care - Topical Spray

A topical treatment of Effective Micro-organisms to beat seasonal skin problems.

Easy to apply. Eco friendly unpressurised spray.

Inhibits the growth of pathogenic fungi and disease-causing bacteria. Horses get a more shiny coat and a softer mane and tail.

Helps in winter against -

- **Mud fever**
- **Rain scald**
- **Thrush**
- **Ringworm**
- **Itchiness**

Helps in summer against -

- **Dry skin & scurf**
- **Sweet itch**
- **Summer dermatitis**
- **Nuisance flies**
- **Heals wounds faster.**
